

```
import random
print("welcome to the baloon game\n")
print("let is get started_\n")
print("give me first the name of the numbers in this competition\n")
print("simo , touzani , zawa9 , akira , mouhamed")
guess = random.randint(0 , 3)
print("the number i choosed is ....\n")
print(guess)
print("now the name i choosed will throw the balloon\n")
print("anyone the ball would beat him will be the second one who is gonna throw the balloon\n")
print("and the last one who is gonna stay will win\n")
guess_two = random.randint(3 , 10)
print("the number i choosed is\n")
print(guess_two)
print("ok now the number i choosed it is gonna throw the balloon\n")
guess_three = random.randint(10 , 20)
print(guess_three)
print("now the next number it is the number before the last\n")
print("ok let's go throw it \n")
guess_four = random.randint(20 ,30)
print(guess_four)
print("ok so now we have one more step the one who is gonna keep the ball is the winner\n")
print("alright go\n")
guess_five = random.randint(30 , 40)
print(guess_five)
print("congratulations the one who still until the end")
```
